DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a device, classified in class 356, subclass 369.
- II. Claims 19-21, drawn to a vacuum adapter, classified in class 356, subclass 123.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the vacuum adapter (subcombination) is claimed in greater detail than the vacuum adapter (first part) of the device (combination). Since claims to both the vacuum adapter and the device are presented and assumed to be patentable, the omission of the specifics of the vacuum adapter in invention I in the combination, but included in invention II, are evidence that the patentability of the device does not rely on the details of the specific vacuum adapter.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 2851

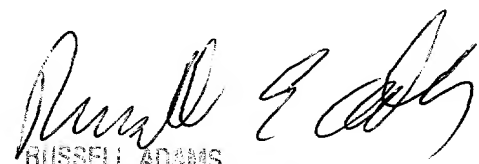

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
